1. Introduction

Assignment 1 identified several multimedia communication problems at Fadwa Collection. The business mainly depended on Instagram and WhatsApp, and one of the key problems was the lack of consistent branding. There was no established logo, colour theme, or common post style. The purpose of this Corporate Brand Kit is therefore to create a clear and consistent visual identity that can be applied to future multimedia materials.

2. Brand Concept

The brand concept for Fadwa Collection is based on elegance, quality, and modern fashion. The visual direction is clean and premium, using a limited colour palette, elegant typography, fashion photography, curved shapes, and thin accent lines. The main brand message is "Timeless Style, Modern You." This concept is intended to make the business easier to recognise and to create a more professional appearance.

3. Mini Brand Board

The mini brand board establishes the basic visual rules for Fadwa Collection. It contains the logo, three main colours, heading and body typefaces, and one consistent graphic style.

Colour	HEX Code	Purpose
Burgundy	#68101C	Primary colour for headings and major brand elements.
Cream	#F4E3D8	Main light background colour.
Gold	#C99532	Accent colour for lines and decorative details.

Heading Font: Cormorant Garamond

Body Font: Montserrat

Graphic Style: Elegant luxury fashion style using clean layouts, curved shapes, thin gold lines, fashion photography, and generous negative space.

4. Selected Corporate Materials

Three corporate materials were developed to demonstrate how the new identity can be applied consistently. The completed designs will be submitted separately through the Google Drive link.

4.1 Corporate Profile Cover

The corporate profile cover introduces Fadwa Collection in a professional way. It uses the logo, brand colours, fashion imagery and the main brand message. Its purpose is to create a strong first impression and establish the visual identity immediately.

4.2 Business Card

The business card applies the same identity to a small professional format. Burgundy, cream and gold are repeated together with the logo and clear contact information. Its purpose is to support networking and provide a consistent physical representation of the brand.

4.3 Email Signature

The email signature brings the identity into digital communication. It uses the logo, contact information and the same visual style so that business emails appear more professional and recognisable.

5. Design Rationale

Burgundy was selected as the primary colour because it creates a strong and sophisticated fashion appearance. Cream provides a soft, clean background, while gold is used in smaller amounts to create a premium accent. Cormorant Garamond gives the headings an elegant editorial character, while Montserrat keeps supporting information modern and readable. Using these elements consistently allows the different materials to look like parts of one brand rather than unrelated designs.

6. Relationship to Assignment 2

The Corporate Brand Kit acts as the visual direction for Assignment 2. Assignment 1 identified the communication need, while this brand kit provides a prototype of how Fadwa Collection should look. The same logo, colours, typography, and graphic style can therefore be applied when developing the complete multimedia solution in Assignment 2.

7. Affinity Development

The final corporate materials are created and edited in Affinity. Workspace screenshots will be included in the Google Drive submission as evidence of the design process and final development.

8. Use of AI

AI was used for brainstorming, visual inspiration, and exploring mockup ideas. The AI-generated references were used only to support the design process. The final submitted materials were created and edited in Affinity.

9. Conclusion

The Fadwa Collection Corporate Brand Kit provides a consistent visual identity that responds directly to the branding problem identified in Assignment 1. The three-colour palette, typography, and elegant graphic style create a recognisable direction that can be used across the corporate profile cover, business card, email signature, and future multimedia materials.
