Cyber Alliance Logo: Concept and Color Meaning

Logo Concept

The Cyber Alliance logo is created by combining five important ideas.

- **Technology:** This is shown by the digital circuit lines on the sides.
- **Protection:** The large shield shape represents safety and defense.
- **Security:** The padlock in the middle shows that information is locked and safe.
- **Unity:** The group of people at the bottom shows teamwork and standing together.
- **Global Connectivity:** The curved lines over the globe show that everything is connected around the world.

When you put all these parts together, they match the brand's main message: "United Today - Secure Tomorrow".

Color Meaning

To follow the competition rules, the logo uses three specific colors: blue, white, and black.

- **Blue (**0138bf**):** This is a very common color in the tech world. It represents trust, intelligence, and digital spaces.
- **Black (**000000**):** Black is a very strong color. It shows power, authority, and solid defense against cyber threats.
- **White (**ffffff**):** White is used for the background and negative space. It keeps the design clean, balanced, and easy to read.
